

Information Services Board Enterprise Architecture

Prepared by Greg Brant, DIS/MOSTD, (360) 902-3519.

Description

The ISB Enterprise Architecture (EA) Committee will request approval of its charter, by-laws, mission, and the EA Principles. The EA Committee will update the ISB on recent activities and future plans.

Recommendation to the Board

The ISB staff recommends that the board approve the EA Committee Charter, By-laws, Mission, and Principles.

Committee Membership

Thomas Bynum,
Assistant Commissioner, ESD

Tom Clarke, CIO, AOC
Sue Fleener, CIO, WSP
Susan Hettinger,
Deputy Director, DIS
Mike McVicker, Interim Director,
DIS

Christy Ridout, CIO, DSHS
Julian Soh, CIO, DOR
Laura Parma, Assistant
Director, DIS
Greg Brant, Chief Enterprise
Architect, DIS

Current Initiatives

1. Determine Overall Charter, By-Laws, Mission, and Principles of the EA effort

The EA Committee has developed, and is recommending for adoption the Charter, By-Laws, Mission, and Principles of the EA effort

2. Determine the Environmental Trends and Business Drivers.

The EA Committee has determined the primary Environmental Trends and Business Drivers of the State of Washington. These are used to create a set of Architectural Principles that serve as the foundation on which to build the EA.

3. Create an ISB EA Committee website

This will help agencies to better engage in the EA process. It will provide access to EA deliverables sooner, thus adding value as the work progresses. It will also increase the likelihood that individual agency EA efforts remain in sync with the statewide effort.

The URL is: <http://isb.wa.gov/architecture/>

4. Next Steps – Determine what architecture components belong in the EA

The EA Committee is working on determining which architecture components will be designated common across the state, versus specific to an agency.
